

Elections to Council Nucleus and Nominating committee 2024-2026

Motivation letter: Why are you interested in joining the Council Nucleus or Nominating committee (250 words max)?

I am active in the field of cardio-oncology from 2013. I established the first cardio-oncology clinic in Israel within Department of Cardiology of Rabin Medical Center with close collaboration of Departments of Oncology and Hematology. Since then, we arranged 3 international conferences in Israel on this topic and attracted the participants from over the globe. I took active participation in multiple international Position and Guideline documents in cardio-oncology and involved in the editorial boards of two specialized cardio-oncology journals (JACC cardio-oncology and Cardio-Oncology), as well serve as associated editor of cardio-oncology section of Frontiers in Cardiology. In 2019, I chaired the committee on cardio-oncology of Israel National Council on the Treatment and Prevention of Cardiovascular Diseases of the Ministry of Health. During 2023, we with prof. Dan Gilon translated in Hebrew ESC patient guidelines in cardio-oncology and disseminated the document within oncology and cardiology community in Israel. I am planning to establish the dedicated working group on cardio-oncology within Israel Heart Society. If I will be elected in the Nucleus of ESC cardio-oncology council I will bring my large experience in establishing cardio-oncology services in various healthcare systems, especially promoting post-cancer therapy assessment and community surveillance. I plan to promote international research projects in the field of cardio-oncology – Wise Cost-Conscious Use of Cardio-Vascular Monitoring of Cancer Patients. I am very interested in promoting the research and use of cardio-oncology rehabilitation during and after cancer therapy.
